Let's Start!

Let's embark on the adventure of a lifetime!

Learning Outcome

Describe routines and regular activities in a wider range of social and work contexts.

Ask your partner:

- Have you heard of the Galapagos Islands?
- Do you know what countries have exotic islands in South America?

Can Do Statements

- I can talk about natural wonders.
- I can discuss experiences I've had or haven't had.
- I can talk about general and specific quantities.

Let's Explore!

Let's find out about one of the most **secluded*** places on the planet!

* "Secluded" means distant and remote.

Instructions: Read the text aloud.

Have you heard of the Galapagos Islands?

The Galapagos Islands have sheltered incredible wildlife for millions of years. Where did these animals come from? How did their ancestors arrive on the islands? It all began about 3 million years ago. Wind currents led many insects to the islands. Gulls and several other types of sea birds made their way there with their ability to glide over long distances.

Sea lions and penguins swam there, with the help of the strong currents of the oceans. Many other species arrived traveling on natural rafts, which originated along South American riverbanks.

In fact, scientists believe that's how the famed Galapagos tortoises got there! So, thanks to the wind and the sea and other natural phenomena, the Galapagos have become the final destination for the spiny-crested marine iguana, the lava lizard, the frigate bird, the pintail duck, and thousands of other species that have made the islands their home.

Let's Practice!

Let's get some facts about the Galapagos!

Instructions: Select all the correct answers. Check your pronunciation with your instructor.

Which sentences talk about a general quantity?

1. The Galapagos are home to three different kinds of iguanas.
2. Animals came to the islands 3 million years ago.
3. Thousands of species call the Galapagos home.
4. Many animals arrived on natural rafts.
5. There are 11 species of tortoises on the islands.
6. The Galapagos have attracted animals for millions of years.

Let's Practice!

The Galapagos are truly wonderful!

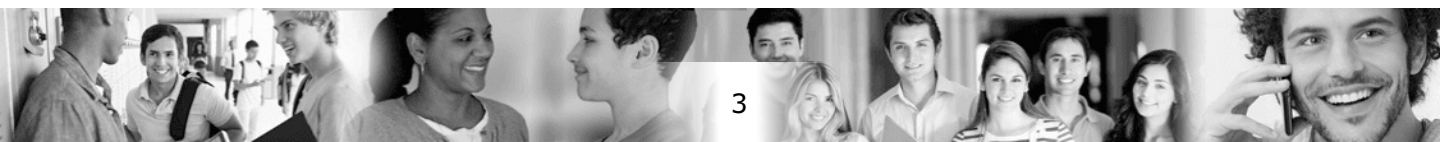

Instructions: Organize the mystery sentence. Put each word in the correct order.

1. the / insects / . / islands / Wind / led / many / to / currents

2. their / Sea / made / with / over / distances / ability / to / birds / long / their / . / way / glide / there

3. on / traveling / . / arrived / species / Many / rafts / natural / other

4. got / that's / tortoises / Scientists / ! / famed / there / believe / how / Galapagos / the

Extension Activity

Write about natural wonders.

Instructions: Complete the following steps. Fill in the Self-Assessment.

- Go online and find information about a natural wonder.
Is it an island? A mountain? A lake?
- Write a text about this place (12-14 lines).
- Give some important facts about its history, the wildlife and its situation today.
- Share your article with your partner and read your partner's article.

Self-Assessment

Yes

No

I research natural wonders.

☐ ☐

I write about natural wonders.

☐ ☐

I talk about past events.

☐ ☐

Target Words

- to shelter** (verb): to protect or shield from danger
e.g. The islands have sheltered many animals.
- wildlife** (noun): animals and plants found in their native habitats
Example: The Galapagos Islands are home to a diverse selection of wildlife.
- ancestor** (noun): an early type of animal from which others have evolved
e.g. How did their ancestors arrive on the islands?
- current** (noun): the strong motion of water or air
e.g. Wind currents led many insects to the islands.
- to glide** (verb): to move in a smooth, continuous motion
e.g. Sea birds glided over long distances to get to the islands
- species** (noun): a group of living organisms that share similar features
e.g. Many species found their way to the Galapagos.
- raft** (noun): a floating platform made of wood or other materials
e.g. Many species traveled on natural rafts.
- phenomenon** (noun): an observable fact or situation difficult to explain
e.g. The Galapagos Islands have become a unique place on earth thanks to natural phenomena.

Learning Points

The Present Perfect Tense vs. The Simple Past Tense

You use the Present Perfect tense to talk about a finished action or event that is connected to the present in some way.

You use the Simple Past tense to talk about a finished action or event **not** necessarily connected to the present.

- You can use the Present Perfect tense to talk about experience.
- When you use the Present Perfect tense, you think about the past and present together. There is some connection between what happened in the past and now.
- For example:
 - *I have eaten lunch.* = I ate lunch and now I am not hungry.
 - *He has bought a painting* = He bought the painting in the past and now he has a painting.
- Look at the chart about how to form the Present Perfect tense:

We use **have/has + the past participle** of the verb in Present Perfect sentences.

	Past tense form	Past participle form	Example
shelter	sheltered	sheltered	The Islands have sheltered wildlife.
become	became	become	They have become the final destination for many animals.

Examples:

- *The Galapagos Islands have sheltered incredible wildlife for millions of years.*
- *It all began 3 million years ago.*

Learning Points

Quantifiers

You use a quantifier before a noun to indicate the amount or number of an item. Quantifiers do not indicate a specific quantity but rather a general amount.

- You use quantifiers with both count and non-count nouns.
- Quantifiers like *a few, several, many, hundreds, thousands, or millions*, can only be used with count nouns.
- You can use all of the quantifiers below with both count and non-count nouns.

Quantifier	Meaning
more	a larger number/amount
less/fewer	a smaller number/amount
no/none	zero, nothing
any /not any	ask about a number or amount/say there is no
some	a small number/amount
a lot of / lots of	a very large number/amount
plenty of	more than you need
enough	as much as you need

Examples:

- *Wind currents led many insects to the islands.*
- *Several types of sea birds made their way to the Galapagos Islands.*
