Let's Start!

Let's travel to the land of ice and snow!

Learning Outcome

Describe routines and regular activities in a wider range of social and work contexts.

Ask your partner:

- How many continents are there?
- What do you know about Antarctica?
- Have you heard of the hole in the ozone layer?

Can Do Statements

- I can describe the characteristics of natural wonders.
- I can talk about natural wonders.
- I can talk about the history of important places.

Let's Explore!

Let's explore a continent that has **puzzled*** scientists for centuries!

* To "puzzle" means to cause someone to feel confused when they cannot make sense of something.

Instructions: Read the text aloud.

Antarctica has always been a land of unexplored mysteries. Its size and shape were unknown until Captain James Cook sailed around the continent in 1770. Early maps of Antarctica showed only a portion and contained many mistakes. Since then, satellite pictures have helped us build an accurate map of the whole continent.

Antarctica was initially known as the land of commercial opportunity. People traveled to Antarctica to hunt seals or whales. Over the years, scientific research replaced hunting wildlife. Antarctica has now become a continent of science and research.

Eighteen countries have built scientific research stations that operate all year long. Studies range from finding out more about the ozone layer to biological studies on endangered wildlife. People do not hunt animals in Antarctica anymore. Instead, they would rather find ways to improve the world. Scientists would rather use the continent for peaceful activities. This is why a treaty was signed in 1959 to protect Antarctica.

Let's Practice!

Antarctica is one of the most mysterious places on earth.

Instructions: Read the text again. Select the correct answer.

1. The size and shape of Antarctica were unknown ...
 - a) until Captain Cook has sailed around the continent in 1770.
 - b) until Captain Cook sailed around the continent in 1770.
 - c) until Captain Cook has sails around the continent in 1770.
2. Eighteen countries ...
 - a) have build research stations in Antarctica.
 - b) build research stations in Antarctica.
 - c) have built research stations in Antarctica.
3. Antarctica
 - a) has become a continent of science and research.
 - b) has became a continent of science and research.
 - c) did became a continent of science and research.

Let's Practice!

Antarctica is one of the world's most precious natural wonders.

Instructions: Choose the word from the Word Bank to complete the sentences correctly.

Word Bank

continent / wildlife / ozone layer /
commercial / accurate

Antarctica has always been a land of _____ mysteries. _____ pictures have helped us build an _____ map of the whole _____. Antarctica was initially known as the land of _____ opportunity. Now scientists try to find out more about the _____ and its effects on endangered _____.

Extension Activity

Let's find out about famous explorers.

Instructions: Complete the following steps. Fill in the Self-Assessment.

- Go online and find information about a famous explorer.
- Who was it?
- Find out where they traveled to and how they got there.
- Find out what they discovered. For example, did they discover a new unexplored territory? Another group of people?
- Find out how they changed the world that we know.
- Write a presentation (12-14 lines) and share it with your partner.

Self-Assessment

Yes

No

I write about natural wonders.

☐ ☐

I write about famous explorers.

☐ ☐

I write about events in the past.

☐ ☐

Target Words

- **unexplored** (adjective): an area not investigated or mapped
e.g. Antarctica has always been a land of unexplored mysteries.
- **unknown** (adjective): not familiar; secret
e.g. The shape of Antarctica was unknown until James Cook sailed along its shoreline in 1770.
- **satellite** (noun): a device that orbits the earth in order to collect information
e.g. Satellite pictures have helped us build a map of Antarctica.
- **accurate** (adjective): correct in all details; exact
e.g. The pictures provide an accurate map of Antarctica.
- **continent** (noun): a large, continuous expanse of land
e.g. Antarctica is the only continent that is entirely covered in ice.
- **ozone layer** (noun): the part of the earth's atmosphere that absorbs most of the Sun's radiation
e.g. Scientists are trying to find out more about the hole in the ozone layer.
- **peaceful** (adjective): not seeking war or violence
e.g. Scientists would rather use the continent for peaceful activities.

Learning Points

The Present Perfect Tense vs. The Simple Past Tense

To talk about the past, you can use the Simple Past and the Present Perfect.

For the Present Perfect tense, you think about the past and present together, because there is some connection between what happened in the past and now.

For example:

- *Antarctica has always been a land of unexplored mysteries.* (It was a land of unexplored mysteries in the past, and it's a land of unexplored mysteries now.)

You use the Simple Past tense to talk about a finished action or event not connected to the present. When we use the Simple Past, we use certain time expressions, such as: *yesterday, two days ago, a month ago, last Sunday, in 1979*, among others.

For example:

- *Over the years, scientific research replaced hunting wildlife.*

	Past tense form	Past participle form	Example
be	was	been	<i>Antarctica has always been ...</i>
help	helped	helped	<i>Satellite pictures have helped ...</i>
build	built	built	<i>Countries have built ...</i>

Examples:

- *Antarctica has always been a land of unexplored mysteries.*
- *Its size and shape were unknown until Captain James Cook sailed around the continent in 1770.*
- *Since then, satellite pictures have helped us build an accurate map of the whole continent.*

Learning Points

Would Rather for What Is Preferable

You use the expression *would rather ...* + verb to express a preference. You can also use the contraction *'d rather ...* You use *Would you rather ... ?* to ask about someone's preferences.

Would rather ... introduces a comparison between two options. You use this expression context clearly allows the subject to make a choice between one option or the other.

Example: *Would you rather visit Spain or Antarctica?*

You use *would rather* + *than* to express a comparison between two things.

Example: *I would rather explore the world than work in an office.*

When the subjects are different, you use *would rather* + *Past Simple*.

Example: *I'd rather you didn't go out tonight.*

Examples:

- *The scientists would rather find ways to improve the world.*
- *They'd rather use Antarctica for peaceful activities than for hunting seals.*
