## Learning Points

### Stressing New Information

When you want to stress new information, you use different intonation and stress on the "new" word or idea.

You usually stress content words in a sentence. Content words are the words that carry the most meaning (nouns, verbs, adjectives, adverbs etc.).

When you want to introduce new information in a conversation, you can choose to put the stress and the intonation on the "new" words. This helps the listener understand that you want to stress that word and that it is important.

Look at this simple conversation:

Tom: I **need** a **pair** of **shoes**.

Jason: What **kind** of shoes? ("kind" is the new information, "shoes" is the old)

Tom: **Dress** shoes.

Jason: Any **color** of dress shoes?

Tom: **Black** dress shoes.

When you stress these "new" words, your voice will rise slightly (intonation).

### Talking About What Is Advisable

You use the modal *ought to* and *might want to* to give advice. You can also use *had better* to express a recommendation. You can use the contraction 'd better when you speak.

You use *Ought to* to offer strong advice.

Example: *You ought to pack warm clothes* = You have to pack warm clothes.

You use *Might want to* to make a suggestion.

Example: *You might want to pack warm clothes* = I suggest that you pack warm clothes.

You can use *Had better* to give a strong recommendation.

Example: *You had better save your money* = I strongly recommend you save your money.

### Examples:

- *You'd better start training!*
- *You ought to find a tranquil place to relax.*
- *You might want to save your money.*
